Industry Overview M&A Transactions & Performance

CORPORATE FINANCE INC.

Publicly Disclosed Dealership Transactions (North America)¹

M&A Market Update - Q4 2021

M&A Activity

- Publicly disclosed M&A activity in the North American dealership industry has exploded in the latter half of 2021, reaching 106 disclosed transactions thus far, exceeding the 43 transactions disclosed in 2020. Due to the semiconductor shortage, fewer vehicles are being manufactured. Although profit margins may be increasing in the dealership space, revenues may be decreasing as a result of the lack of supply.
- Lithia Motors continues to be one of the most active buyers as part of their aggressive growth strategy. After entering the Canadian market by making its first Canadian acquisition in August 2021, Lithia's number one expansion target is Canadian dealerships.²
- Due to the limited number of publicly traded automotive companies in Canada, substantially all the transaction value and volume in the chart noted above is related to US transactions. However, while different markets, M&A activity in the US may be indicative of overall macro trends in the M&A market, including Canada.

Automotive

- Due to supply constraints, semiconductor shortages, and the lasting effects of the COVID-19 pandemic, passenger vehicle sales are down 12.8% in Q4 2021, compared to Q4 2020.³
- As part of Canada's goal of achieving net-zero greenhouse gas emissions by 2050 (Bill C-12), all new light passenger vehicles sold in Canada must be zero-emission by 2035, paving the way for some OEMs, and dealers, to respond better than others in the changing marketplace.

Agriculture Implement

- Consolidation amongst Case-IH, New Holland, and Kubota dealers has accelerated. Valuations can vary significantly by location, size, and historical performance.
- In comparison to the Q4 2020 year-to-date period, year-to-date Q4 2021 unit retail sales in Canada increased 20.5% for farm tractors and 28.1% for self-propelled combines.⁴

Heavy Truck

- Fragmented marketplace presents an opportunity of M&A activity amongst dealerships.
- Q4 2021 trailer orders totaled 49,508, down 48% from Q3 2020 with higher-than-normal sales of 95,600. Demand is expected to rise moving into 2022 but supply chain issues may complicate production.⁵
