

This snapshot does NOT discuss hedge accounting. Where an entity applies hedge accounting, the treatment may differ from what is depicted in this snapshot (refer to the relevant IFRS 9 section).

Note: IFRS 9 is effective for annual periods beginning on/after Jan 1/18; earlier adoption is permitted.

SCOPE	INITIAL RECOGNITION	CLASSIFICATION AND INITIAL MEASUREMENT																			
<p>Applies to all types of financial instruments (“FI”) (i.e., contract that gives rise to a financial asset (“FA”) of one entity and financial liability (“FL”)/equity instrument (“EI”) of another entity). Specifically:</p> <ul style="list-style-type: none"> Loan commitments designated as @ fair value through profit and loss (“FVTPL”) or at below-market interest rates. Derivatives (including embedded derivatives) relating to leases, loan commitments, insurance contracts, interest in subsidiaries, associates or joint ventures (if derivative liability). Receivables arising from customer contracts (IFRS 15). <p>Exceptions relating to:</p> <ul style="list-style-type: none"> Interests in subsidiaries, associates and joint ventures (IFRS 10, IAS 27 or 28). Leases (IAS 17). Employee benefit plans (IAS 19). FI classified as EI under IAS 32 (holder still applies IFRS 9). Share-based payment transactions (IFRS 2). Insurance contracts (IFRS 4). FIs with discretionary participation features (IFRS 4). Financial guarantee contracts. Forward contracts that result in business combination (IFRS 3). Loan commitments. Reimbursement rights recognized as a provision (IAS 37). Certain rights and obligations relating to revenue from customer contracts (IFRS 15). Contracts to buy/sell non-financial items that can be settled net in cash/another FI/by exchanging FIs, as if contracts were FIs which were entered into and still held for receipt/delivery of non-financial item based on entity’s expected purchase/sale/usage requirements and were NOT irrevocably designated as measured @ FVTPL. 	<p>Recognize FI when entity becomes party to instrument’s contractual provisions (i.e., trade date) except for:</p> <ul style="list-style-type: none"> Regular way purchases or sales = delivery required within time frame generally set by regulation/convention in marketplace. Apply trade or settlement date accounting. <ul style="list-style-type: none"> Trade date accounting → regular recognition and derecognition. Settlement date accounting → asset recognized when received. Change (“Δ”) in fair value (“FV”) between trade and settlement date recognized as follows: <ul style="list-style-type: none"> FI @ amortized cost – not recognized. FI @ FVTPL – in profit/loss (“P/L”). FI @ FVOCI – in other comprehensive income (“OCI”). 	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="background-color: #2c3e50; color: white;">FINANCIAL ASSETS</th> <th colspan="2" style="background-color: #2c3e50; color: white;">FINANCIAL LIABILITIES</th> </tr> </thead> <tbody> <tr> <td style="vertical-align: top;"> <p>Based on business model for managing FA and contractual CF characteristics of the FA., classify as @:</p> <ul style="list-style-type: none"> Amortized cost FVOCI or FVTPL (See Appendix A below.) </td> <td style="vertical-align: top;"> <p>Amortized cost except for:</p> <ul style="list-style-type: none"> FL arising from transfer of FA not qualifying for derecognition or requiring continuing involvement. This snapshot does NOT discuss hedge accounting. Where an entity applies hedge accounting, the treatment may differ from what is depicted in this snapshot (refer to the relevant IFRS 9 section).

Note: IFRS 9 is effective for annual periods beginning on/after Jan 1/18; earlier adoption is permitted.

IMPAIRMENT

Recognize loss allowance for debt instrument FAs measured @ amortized cost or FVOCI (e.g. loans, debt investments and receivables), contract assets (IFRS 15), lease receivables (IAS 17), and loan commitments or financial guarantee contracts not measured @ FVTPL. (N/A to equity investments and FIs @ FVTPL).

- 1) Recognize **lifetime expected credit losses** = expected credit losses ("ECL") from all possible default events over expected life of FI, IF either:
 - o Credit risk significantly ↑ since initial recognition and not considered low, or
 - o Purchased or originated credit-impaired FA.
- 2) **OTHERWISE**, recognize **12-month ECL** = portion of lifetime ECL from default events possible within 12 months after the reporting date.

Simplified approach:

- Always use lifetime ECL for trade receivables or contract assets within scope of IFRS 15 if no significant financing component or entity applies the practical expedient for contracts that ≤ one year.
- Make accounting policy choice to use lifetime ECL for lease receivables within scope of IAS 17 and trade receivables/contract assets within scope of IFRS 15 that contain a significant financing component.

Significant ↑ in credit risk

- Assess ↑ in probability of occurrence of default since initial recognition.
- Rebuttable presumption that credit risk has ↑ significantly when contractual payments are > 30 days past due.

Measurement of ECL of a FI reflects: 1) an unbiased and probability-weighted amount determined by evaluating a range of possible outcomes; 2) the time value of money; and 3) reasonable and supportable information available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

▪ **Credit loss** = present value ("PV") of difference between contractual CFs due and CFs the entity expects to receive (i.e., cash shortfalls) discounted using original EIR or credit-adjusted EIR for purchased/originated credit-impaired FA.

- For undrawn loan commitments, CFs must consider expected drawdowns on loan

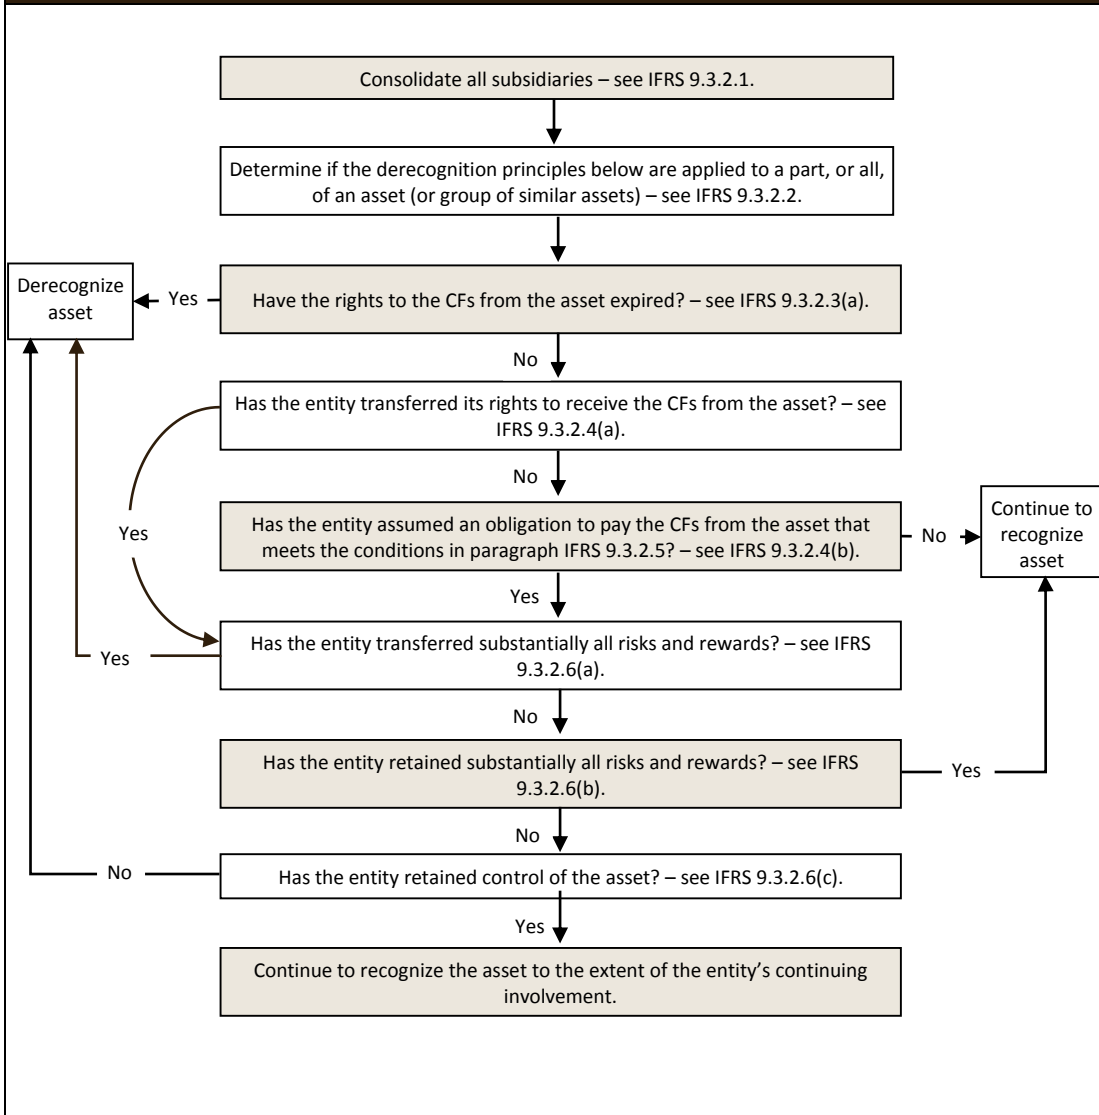

Financial guarantee contract = requires issuer to make specified payments to reimburse holder for loss incurred because specified debtor fails to make contractual payments.

- For financial guarantee contracts, cash shortfalls are the expected payments to reimburse holder for credit loss incurred MINUS amounts recovered from holder/debtor/other party.

Loss allowance recognized in P/L and for:

- FAs measured @ amortized cost, lease receivable or contract asset → netted against carrying amount of FA.
- Loan commitment or financial guarantee contract → recognized as provision.
- Debt instruments measured @ FVOCI → recognized in OCI (i.e., not netted against carrying amount of FA).

DERECOGNITION OF A FA

DERECOGNITION OF A FL*

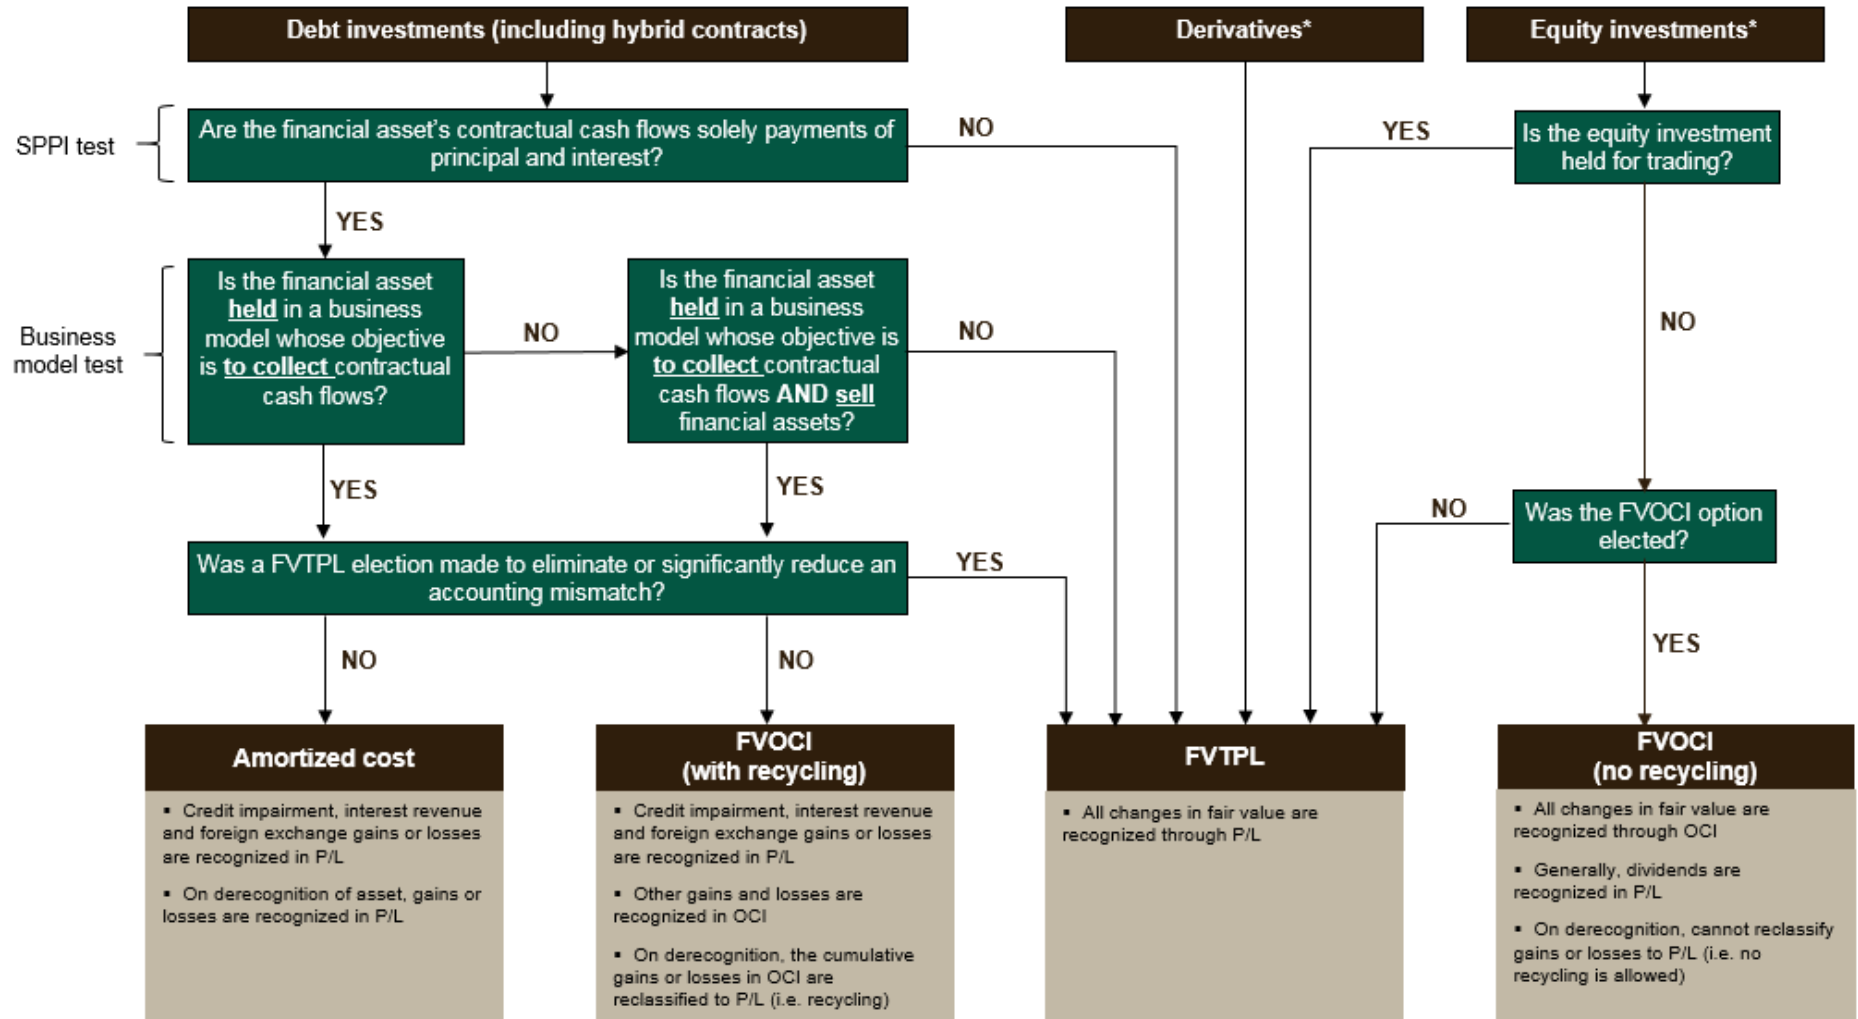

- Derecognize FL (or part of) when obligation in contract is extinguished (i.e., discharged/cancelled/expired).
- For substantial modification/exchange of substantially different FIs → extinguish and recognize new liability with difference in P/L.

*Applies to all loan commitments and lease payables.

This snapshot does NOT discuss hedge accounting. Where an entity applies hedge accounting, the treatment may differ from what is depicted in this snapshot (refer to the relevant IFRS 9 section).

Note: IFRS 9 is effective for annual periods beginning on/after Jan 1/18; earlier adoption is permitted.

Appendix A: Classification and Measurement of FAs

* Assuming contractual terms of FA do not give rise on specified dates to CFs that are solely payments of principal and interest on the principal amount outstanding. This is generally the case for equity investments and derivatives; hence, we recommend this simplified approach to classification of these instruments.

This snapshot does NOT discuss hedge accounting. Where an entity applies hedge accounting, the treatment may differ from what is depicted in this snapshot (refer to the relevant IFRS 9 section).

Note: IFRS 9 is effective for annual periods beginning on/after Jan 1/18; earlier adoption is permitted.

Appendix B: Impairment of Financial Assets
