Engineering and construction merger and acquisition (M&A) activity in Q4 2020 exceeded \$850 million in disclosed transaction value across 104 deals in Canada and the US. The largest transaction in the quarter was First Reserve Corporation's acquisition of The Goldfield Corporation for \$271 million. In the last 12 months, 90% of acquirers have been strategic parties while 10% have been financial sponsors. Although private equity firms still boast a strong cash position, many firms continue to focus on guiding current portfolio companies through the COVID-19 turmoil.

# Macroeconomic Indicators

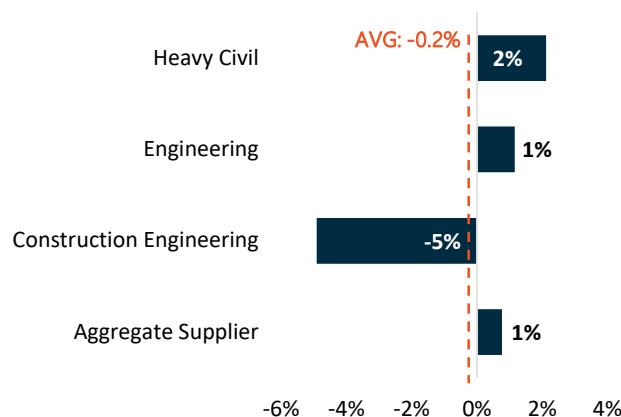

Key external drivers that affect the Engineering & Construction industry in Canada include the value of non-residential construction (expenditures on office buildings, hospitals, factories, power plants, mining shafts, communication lines, farms, railroads, and schools), aggregate private investment (investment in gross fixed capital formation and inventories), government expenditure and investment (the total value of services produced by federal, provincial, and local governments as well as investment in fixed assets), and the interbank overnight lending rate in Canada. Lower interest rates in the recent periods have driven up the government expenditure and investment, value of residential and non-residential construction, and private investment.
