WHEREAS on March 13, 2020, the Ontario Superior Court of Justice certified a national class as described herein in relation to alleged claims against the Defendants by users of the Abilify Drugs;

WHEREAS the Parties have engaged in extensive, arm’s-length negotiations through counsel with substantial experience in complex class proceedings and a mediator, which negotiations have resulted in this Settlement Agreement;

WHEREAS the Plaintiffs and Class Counsel have reviewed and fully understand the terms of this Settlement Agreement and based on their analyses of the facts and law applicable to the Plaintiffs’ and the Classes’ claims, and having regard to the risks and uncertainties associated with trials and appeals, the Plaintiffs and Class Counsel have concluded that this Settlement Agreement is fair, reasonable and in the best interests of the Plaintiffs and of the Classes that they represent;

WHEREAS the Plaintiffs, Class Counsel and the Defendants agree that neither this Settlement Agreement nor any statement made in the negotiation thereof shall be deemed or construed to be an admission by or evidence against the Defendants or evidence of the truth of any of the Plaintiffs’ allegations against the Defendants, which the Defendants expressly deny;

CANADIAN ABILIFY® AND ABILIFY MAINTENA® CLASS ACTIONS

NOTICE OF SETTLEMENT APPROVAL HEARINGS IN ONTARIO AND QUÉBEC &

NOTICE OF CERTIFICATION OF THE ONTARIO CLASS ACTION

Please read this notice carefully. Ignoring this notice will affect your legal rights

TO: All persons in Canada, including their estates, who:

- were prescribed and ingested ABILIFY® before **February 23, 2017**;
- were prescribed and received injections of ABILIFY MAINTENA® between **February 6, 2014** and **December 16, 2016**; and
- by virtue of a personal relationship with an ABILIFY® Class Member or an ABILIFY MAINTENA® Class Member, are entitled to assert a claim pursuant to the Ontario *Family Law Act* as amended, the *Civil Code of Québec* or equivalent provincial and territorial legislation (such as spouses, children, grandchildren, parents, grandparents, brothers and sisters).

The Canadian class action lawsuits allege that the Defendants were negligent in failing to warn Class Members that ABILIFY® and ABILIFY MAINTENA® can cause, contribute to, or exacerbate Compulsive Behaviours and Impulse Control Disorders, specifically compulsive or pathological gambling, hypersexuality, binge-eating, and uncontrollable shopping.

The parties in the Ontario and Québec class action have reached a proposed settlement (the “Settlement”), subject to approval of the Ontario Superior Court of Justice and the Superior Court of Québec (the “Courts”).

Neither the Ontario Court nor the Québec Court has made any determination of the merits of the claims. The Defendants have denied, and continue to deny, the allegations against them in the Class Actions and have had no role in the determination of Settlement Class Member eligibility to participate in the Settlement or the allocation of benefits available to Settlement Class Members (see Section “D” below).

The Settlement provides for the creation of a CDN \$14.75 million Settlement fund, which will be used to pay compensation for Approved Claims, \$368,750.00 in satisfaction of the claims of the Public Health Insurers, the costs of notice and administration, and Court-approved Class Counsel Legal Fees, disbursements and taxes.

This Notice explains your rights and options as a Settlement Class Member.

A) THE ABILIFY® AND ABILIFY MAINTENA® CLASS ACTIONS

ABILIFY® (generic name aripiprazole) is a prescription medicine which is prescribed to treat certain mental health conditions, including schizophrenia, bipolar disorder and as an adjunctive treatment for major depressive disorder. During the time periods above, ABILIFY® was sold in Canada by Bristol-Myers Squibb Company Canada Co. (“BMS Canada”) and Otsuka Canada Pharmaceuticals Inc (“Otsuka Canada”). ABILIFY MAINTENA® is an injectable form of aripiprazole and during the time period above was sold in Canada by Otsuka Canada and Lundbeck Canada Inc. (“Lundbeck Canada”).

The Class Actions allege that ABILIFY® and ABILIFY MAINTENA® can cause, contribute or exacerbate a variety of compulsive behaviours and impulse control disorders, specifically compulsive or pathological gambling, hypersexuality, binge-eating, and uncontrollable shopping.

B) AUTHORIZATION OF A NATIONAL CLASS ACTION BY THE SUPERIOR COURT OF QUÉBEC

On December 19, 2019, the Superior Court of Québec authorized a national class action on behalf of:

All persons residing in Canada who were prescribed and have ingested and/or used the drug ABILIFY® (aripiprazole) before February 23, 2017 and who developed one or more of the following impulse control behaviours:

- pathological gambling (also known as gambling disorder or compulsive gambling);
- compulsive eating/ binge eating;
- uncontrollable or compulsive shopping or spending; and/or
- hypersexual behaviours/ sexual addiction
(the “Impulse Control Disorders”).

And their successors, assigned, family members, and dependants.

Notice of Authorization of the Québec Class Action was previously published on January 6, 2020. The opt out deadline for class members who did not wish to participate in the Québec Class Action expired on November 19, 2020. If you previously opted out of the Québec Class Action and wish to participate in the Settlement, see **Part F** below.

Individuals who were prescribed and received injections of ABILIFY MAINTENA® are not part of the Québec Action, but are Settlement Class Members by virtue of being Class Members in the Ontario Class Action.

C) CERTIFICATION OF A NATIONAL CLASS ACTION BY THE ONTARIO SUPERIOR COURT OF JUSTICE

On March 13, 2020, Justice Morgan of the Ontario Superior Court of Justice certified a national class action on behalf of:

All persons in Canada including their estates who:

- a) between July 9, 2009 and February 23, 2017 were prescribed and ingested ABILIFY® tablets;
- b) between February 6, 2014 and December 16, 2016 were prescribed and used ABILIFY MAINTENA®; and
- c) by virtue of a personal relationship with an ABILIFY Class Member or an ABILIFY MAINTENA® Class Member, are entitled to assert a claim pursuant to the Ontario *Family Law Act* as amended or equivalent provincial and territorial.

All appeals were completed on February 28, 2022.

D) THE SETTLEMENT AGREEMENT & BENEFITS AVAILABLE TO SETTLEMENT CLASS MEMBERS

The parties to the Class Actions have reached a proposed national Settlement on behalf of Settlement Class Members. The Settlement offers monetary benefits to Settlement Class Members who experienced Compulsive Behaviours or Impulse Control Disorders and related consequences, including psychological harm, illness and hospitalization, financial loss, and loss of care, guidance, and companionship.

The Defendants will pay CDN \$14,750,000.00 (the “Settlement Amount”) to settle the Class Actions on a national basis, without admitting liability. This amount is inclusive of all amounts claimed including without limitation damages, costs, interest, notice costs, administrative costs, and the claims of provincial health insurers. The Settlement Agreement, in English or French, can be obtained from the [Settlement Website](#), through [Rochon Genova LLP](#) and [Consumer Law Group Inc.](#) or by contacting the Claims Administrator, as listed below.

If you have previously opted out of the Québec Class Action and now wish to participate in the Settlement, you must notify Class Counsel of your intention to participate in the Settlement by contacting Class Counsel at [Rochon Genova LLP](#) and [Consumer Law Group Inc.](#) before **[the Opt Out Deadline]**.

H) HOW TO OBJECT TO THE PROPOSED SETTLEMENT

If you are a Settlement Class Member and wish to object to the Settlement, you may deliver a written objection to the Claims Administrator. A valid objection must be postmarked or received by the Claims Administrator at the address below, at least 14 days in advance of the Settlement Approval Hearings.

A Settlement Class Member who wishes to object to the Settlement, or their counsel (if they are represented), shall provide in their objection:

- a) A caption or title that identifies it as an objection to the Settlement;
- b) The full name, current mailing address, telephone number, and email address of the person who is objecting or on whose behalf an objection is being delivered;
- c) A clear statement of the nature and reasons for the objection;
- d) A declaration that the person believes they are a Settlement Class Member and supporting documentation sufficient to establish the basis for that belief;
- e) Whether the person intends to appear at the Approval Hearings or intends to appear by counsel and if by counsel, the name, address, telephone number, and email address of counsel; and
- f) A declaration that the foregoing information is true and correct.

The Claims Administrator will provide a copy of your objection to Class Counsel, who will in turn provide it to the Ontario and Québec Superior Courts and the Defendants. You may, but are not required to, appear at the Settlement Approval Hearing(s) in order to make submissions orally with respect to your objection. If you wish to do so, whether in person or through a lawyer, you must send a notice of intention to appear in writing served, filed and received by the Claims Administrator at least 10 days prior to the Settlement Approval Hearing.

The judge presiding over the Settlement Approval Hearing has discretion to determine whether you will be permitted to make oral submissions during the hearing.

DO NOT send an objection directly to the Ontario or Québec Superior Courts.

An objection to the Settlement is not an Opt Out Form. If you object to the Settlement, you will remain bound by its terms if it is approved by the Ontario and Québec Superior Courts. If you wish to be excluded from the Settlement, you must opt out (see **Part G** above).

RE: Your file #

We are writing to you as the Court-appointed Claims Administrator of the Canadian ABILIFY® and ABILIFY MAINTENA® Class Action Settlement. Thank you for submitting your Canadian ABILIFY® and ABILIFY MAINTENA® Settlement Claim Package. Unless otherwise indicated in this letter, all capitalized terms have the meanings set out in the Settlement Agreement.

This letter confirms that we have received your Claim Package and any attached supporting documentation. Your Claim Package will now be reviewed for completeness and, if it is considered to be deficient (i.e., missing any of the required information and/or documentation), you will be notified in writing and given an opportunity to provide additional information and/or documentation.

If your Claim Package is complete at this time, we will move forward with reviewing your Claim Package for a determination of the eligibility of your Claim, after which you will be sent a Claim Determination Letter that will advise you as to: i) whether you have been approved to receive compensation for Psychological Harm, ii) the category of Psychological Harm (Mild, Moderate, Severe) under which you have qualified (compensation under which is distributed in accordance with the Distribution Grid), iii) whether you qualify for compensation for Residual Catastrophic Injury, iv) whether you are entitled to receive compensation for Financial Loss, and v) the estimate of recovery for any eligible Financial Loss.

Please note that all preliminary determinations of the amount of compensation the Class Member may receive are subject to *pro rata* reductions or increases, depending on the total number of Approved Claims. If your Claim is NOT approved, you will have the opportunity to challenge that decision. The details about how to do so will be set out in the Claim Determination Letter.

No Claims will be paid until all submitted Claims have been finally adjudicated (including the resolution of all Challenges). Within ninety (90) days after all Claims have been finally adjudicated, you will be sent a Final Claim Determination Letter which will advise you of the final determination on your Claim and, if your Claim was approved, it will set out the final amount of your compensatory payment and enclose a cheque in that amount.

If you have any questions or concerns, or if your mailing address or contact information changes, please contact the Claims Administrator's Information Line at 1 (855) 653-0027 or abilifysettlement@mp.ca.

Proposed Settlement Reached in the Canadian ABILIFY® and ABILIFY MAINTENA® Class Actions, Settlement Approval Hearings Scheduled in Ontario and Québec for XXXX and XXX

This notice was approved by the Ontario Superior Court of Justice and the Superior Court of Québec.

Please read it carefully as it may affect your legal rights.

TORONTO, ON and MONTREAL, QC – [Date of release] /Newswire/ – A proposed Settlement has been reached on behalf of all individuals in Canada who were prescribed and took ABILIFY® before February 23, 2017 (“ABILIFY® Class Members”) and/or received injections of ABILIFY MAINTENA® between February 6, 2014 and December 16, 2016 (“ABILIFY MAINTENA® Class Members”) and their family members. The Defendants are the companies responsible for the development, market approval, research, testing, manufacture, and distribution of ABILIFY® and ABILIFY MAINTENA® in Canada.

The Settlement provides for the creation of a CDN \$14,750,000.00 Settlement fund, which will be used to pay compensation for Approved Claims, \$368,750.00 in satisfaction of the claims of the Public Health Insurers, the costs of notice and administration, and Court-approved Class Counsel legal fees, disbursements and taxes. Not all Class Members will be eligible for compensation. The Defendants have no role in the determination of Settlement Class Member eligibility to participate in the Settlement or the allocation of benefits available to Settlement Class Members. To become effective, the proposed Settlement must be approved by the Ontario Superior Court of Justice and the Superior Court of Québec (the “Courts”).

On March 13, 2020, the Ontario Superior Court of Justice certified a national class action on behalf of ABILIFY® and ABILIFY MAINTENA® Class Members relating to the Defendant drug manufacturers’ alleged failure to warn of the risks of compulsive gambling, hypersexuality, compulsive shopping, and binge eating (“Compulsive Behaviours”) associated with ABILIFY® and ABILIFY MAINTENA®.

Previously, on December 19, 2019, the Superior Court of Québec authorized a national class action on behalf of ABILIFY® Class Members. Notice of authorization of the Québec class action was provided on January 6, 2020. The opt-out deadline for ABILIFY® Class Members who did not wish to participate in the Québec Class Action expired on May 31, 2020.

The Courts have not made any determination of the merits of the claims. The Defendants have denied, and continue to deny, the allegations against them in the Class Actions.

If you are an ABILIFY® Class Member who previously opted out of the Québec class action but now wish to participate in the Settlement, you may do so by contacting Class Counsel. If you are an ABILIFY® Class Member, and did not previously opt out of the Québec class action, you may make a request to the Québec Court to opt out of the Settlement. If you do not opt out and the

Settlement is approved and becomes effective, you will be bound by the Settlement which includes a release of your claims.

ABILIFY MAINTENA® Class Members who DO NOT want to participate in the action must opt out by [DATE]. A Class Member who opts out will not be entitled to file a Claim seeking benefits under the Settlement, but will preserve their right to pursue individual actions, subject to any applicable limitation periods. To opt out, ABILIFY MAINTENA® Class Members will need to complete an opt out form and send it to Class Counsel no later than [DATE]. NATURE OF THE ACTION

3. This action relates to the pain, suffering and losses suffered by [REDACTED] and other Class Members and Family Class Members as a result of the Defendants' negligent ~~development~~, research, ~~design~~, ~~manufacturing~~, testing, marketing, promotion, distribution and sale of aripiprazole under the brand names Abilify and Abilify Maintena in Canada.

4. Abilify is an atypical antipsychotic medication approved by Health Canada on July 3, 2009. Abilify was discovered by and is a registered trademark of Otsuka Pharma. The trademark for Abilify is currently used under licence by BMS Canada. Abilify is indicated for the following uses in Canada:

a) Schizophrenia: Abilify is indicated for the treatment of Schizophrenia and related psychotic disorders in adults and adolescents of 15 to 17 years of age;

b) Bipolar I Disorder: Abilify is indicated for the treatment of manic or mixed episodes in Bipolar I Disorder in adults. It may be used as acute monotherapy or co-therapy with lithium or divalproex sodium when there is an insufficient acute response to these agents alone. Abilify is also indicated as monotherapy for the acute treatment of manic or mixed episodes in Bipolar I Disorder in adolescents of 13 to 17 years of age; and

c) Adjunctive Treatment of Major Depressive Disorder (MDD): Abilify is indicated for use as an adjunct to antidepressants for the treatment of MDD in adult patients who have had an inadequate response to prior antidepressant treatments during the current episode;

5. Abilify is available in six dosages strengths, containing respectively 2 mg, 5 mg, 10 mg, 20 mg, and 30 mg of aripiprazole. The recommended beginning and target dosage for Abilify is 10 or 15 mg per day for adults with Schizophrenia, and 15 mg per day for adults with Bipolar I Disorder. The recommended target dosage for adolescents with Schizophrenia and Bipolar I Disorder is 10 mg per day. The recommended starting dosage for Abilify as adjunctive treatment for MDD for patients already taking an antidepressant is 2 mg to 5 mg per day, and Abilify was found to be effective in this capacity at dosage levels of up to 15 mg per day.

6. Abilify Maintena is a prolonged release injectable suspension of aripiprazole indicated for the treatment of Schizophrenia in adults, and as maintenance therapy for Bipolar I Disorder. It was approved by Health Canada on February 6, 2014. It is administered monthly by intra-muscular injection and is available in four strengths: a 300 mg vial, a 400 mg vial, a 300 mg dual chamber syringe, and a 400 mg dual chamber syringe.

7. Hundreds of thousands of individuals have been prescribed Abilify and Abilify Maintena in Canada since the approval of these drugs by Health Canada in July 2009 and February 2014, respectively.

8. At all times during the Class Period, it was well established in the scientific literature that dopamine agonists with similar effects on brain chemistry as Abilify and Abilify Maintena have a tendency to cause, contribute to the development of, or exacerbate Impulse-Control Behaviours and/or Compulsive Behaviours.

9. Further, at all times during the Class Period the Canadian product monograph for Abilify contained no warnings or precautions, or contained inadequate warnings and precautions, relating

to the increased risk of Compulsive Behaviours in patients who use this drug for indicated purposes.

10. When Abilify Maintena was approved for use in Canada in early 2014, the product monograph listed hypersexuality as a psychiatric disorder under the “Less Common Clinical Trial Adverse Drug Reactions <2%”. However, it provided no warning regarding the risk of developing hypersexuality or other Compulsive Behaviours associated with the use of Abilify Maintena. Further, the product monograph for Abilify continued to make no mention at all of the increased risk of developing Compulsive Behaviours, including hypersexuality, despite the inclusion of that disorder in the product monograph for Abilify Maintena.

11. On November 2, 2015, Health Canada issued a Summary Safety Review (the “Safety Review”), concluding that there is a link between the use of Abilify and Abilify Maintena and an increased risk of certain Impulse-Control Behaviours, namely pathological gambling and hypersexuality. The Safety Review was conducted in response to product labelling revisions in Europe, which indicated that there is a clear connection between the use of aripiprazole and an increased risk of developing pathological gambling and hypersexuality.

12. Health Canada’s review of scientific and medical literature also confirmed that in the majority of reported cases of pathological gambling and hypersexuality, the compulsive behaviour resolved completely or improved when the treatment was stopped or the dosage was reduced.

13. As a result of these findings, the Canadian product monographs for Abilify and Abilify Maintena were revised to include certain warnings about the increased risk of pathological

gambling and, in the case of Abilify, the increased risk of hypersexuality, associated with the use of the drugs.

14. On May 3, 2016, six months following the Health Canada information update, the FDA issued a comprehensive warning confirming the association between the use of Abilify and Abilify Maintena and the increased risk of developing Compulsive Behaviours. The FDA warning advised that the use of Abilify and Abilify Maintena is associated with a myriad of compulsive behaviours, including but not limited to pathological gambling, compulsive eating, shopping, and sexual activity, which can affect anyone who is taking the drug. These Compulsive Behaviours were reported to have stopped when the drugs were discontinued or the prescribed dosages were reduced.

15. On December 13, 2016 the Canadian Abilify Maintena product monograph was updated to provide more detailed warnings of the propensity of aripiprazole to cause Compulsive Behaviours, such as pathological gambling and hypersexuality. Approximately two months later on February 23, 2017 the Canadian Abilify product monograph was also updated to contain parallel warnings.

16. The revised product monographs for Abilify and Abilify Maintena further caution that patients with a prior history of gambling disorder may be at an increased risk of gambling while on these drugs, and should be monitored carefully.

17. The Plaintiffs allege, on their own behalf and on behalf of the Class Members, that Abilify and Abilify Maintena are inherently dangerous in that they cause or materially increase the risk of developing Compulsive Behaviours. The Plaintiffs allege that the Defendants were negligent in the development, research, design, testing, ~~manufacturing~~, promotion, marketing, distribution and

sale of Abilify and Abilify Maintena in Canada, in that they failed to conduct adequate pre- and post-marketing research and testing relating to the association between aripiprazole and Impulse Control Disorders and Compulsive Behaviours.

18. The Plaintiffs further allege that the Defendants knew or ought to have known that, when used as indicated, Abilify and Abilify Maintena can cause serious and dangerous side effects, including but not limited to serious Compulsive Behaviours, which can and have resulted in significant harm and losses to the Class Members. However, despite their significant collective resources, and their knowledge of the specific risks and dangers associated with the use of Abilify and Abilify Maintena, the Defendants failed to provide any or any adequate warnings to ~~Mathew~~ the Plaintiffs and other Class Members.

19. At all times during the Class Period, the product monographs for Abilify and Abilify Maintena contained insufficient warnings and precautions, as they failed to warn, or adequately warn, the Class Members of the increased risk of developing Compulsive Behaviours associated with the use of the drugs.

20. Even after warnings about compulsive gambling and hypersexuality were added to the product monographs for Abilify and Abilify Maintena, in June and September 2015, respectively, these warnings remained inadequate and incomplete, as they were underinclusive and failed to warn the Plaintiff and other Class Members of the risk factors and the full breadth of Compulsive Behaviours and harms associated with the use of Abilify and Abilify Maintena.

21. Further, the Plaintiffs allege that the Defendants wrongfully, unlawfully, maliciously and lacking *bona fides*, conspired and agreed together, one with the other, to conceal the risk of

Compulsive Behaviours associated with the use of Abilify and Abilify Maintena from the Plaintiffs and Matthew and other Class Members.

22. As a result of the Defendants' unlawful conduct as described herein, the Plaintiffs and other members of the Classes have suffered, and will continue to suffer, significant harm and losses, including financial, emotional, psychological and other damages, for which the Defendants are liable.

84. BMS is engaged in the discovery, development, licensing, manufacturing, marketing, distribution and sale of pharmaceuticals. It uses a global research, development and supply chain organization responsible for the development and delivery of products to the market. Its products are distributed and sold through regional organizations that serve the United States, Europe, Latin America, Middle East, Africa, Japan, Asia Pacific and Canada. BMS has also collaborated with Otsuka to develop and commercialize Abilify.

85. BMS Canada is a corporation incorporated under the *CBCA*, with its registered head office in Halifax, Nova Scotia. BMS Canada is an indirect wholly owned subsidiary of BMS and maintains a principal place of business in Toronto, Ontario. BMS Canada holds the patent for Abilify for purposes of the Patented Medicine Prices Review Board (PMPRB) in North America, including Canada.

86. Otsuka Pharma is a Japanese corporation, with its head office located in Tokyo, Japan. Otsuka Pharma is the owner of the trademark Abilify. Canadian Patents No. 2,458,929 and 2,445,276 pertaining to Abilify were issued to Otsuka Pharma and BMS on September 8, 2009 and October 13, 2009, respectively.

87. On September 21, 1999, Otsuka Pharma entered into a worldwide commercialization and collaboration agreement (the “Agreement”) with BMS to co-develop and co-promote Abilify. Under the Agreement, Otsuka Pharma retained the right to commercialize Abilify in the U.S. and other “co-promotion countries” in the EU, as well as in Japan, China, North Korea, South Korea, Philippines, Thailand, Indonesia, Pakistan and Egypt, and granted BMS an exclusive license to commercialize Abilify in the rest of the world, including Canada.

88. Pursuant to the terms of the Agreement, BMS is the principal for third-party product sales in several countries, including Canada, where it is the exclusive distributor for or has an exclusive right to sell Abilify. BMS recognizes 100 percent of the net sales of Abilify in Canada.

89. At all times during the Class Period, the Agreement was in full force and effect in Canada.

90. OAI is a U.S. holding company that is wholly owned by Otsuka Pharma. OAPI, OPDC, and OMML are subsidiaries of OAI.

91. OAPI is a corporation incorporated in Delaware. Its corporate headquarters are located in Rockville, Maryland. OAPI is part of the Otsuka Group, which oversees all pharmaceutical and medical device related commercial activities in North America, including Canada.

92. OPDC is a corporation with headquarters located in Princeton, New Jersey. OPDC is part of the Otsuka Group responsible for the research and clinical development of healthcare products. As a global development centre for the pharmaceutical products of Otsuka, including Abilify in Canada, OPDC conducts clinical development covering a broad range of disorders in areas including the central nervous system, cardiovascular system, oncology, ophthalmology and infectious diseases.

93. OMML is a corporation with headquarters located in Rockville, Maryland. OMML is a research centre that conducts basic and applied research to support global clinical studies. OMML engages in drug discovery, including the discovery of Abilify, in conjunction with Otsuka Pharma.

94. Otsuka Pharma and OAI and its subsidiaries, OAPI, OPDC, and OMML, were responsible for the development and testing of Abilify. The July 2009 Health Canada approval for Abilify was based largely on the testing conducted by Otsuka Pharma, OAI and its subsidiaries.

95. Otsuka Canada is a corporation incorporated under the *CBCA*, with its head office located in Montreal, Quebec. Otsuka Canada specializes in commercializing Otsuka medical products in Canada. Otsuka Canada imports and markets Abilify and Abilify Maintena throughout Canada. Otsuka Canada also books all sales of Abilify Maintena in Canada.

96. At all material times, Otsuka Pharma, OAI, OAPI, OPDC, OMML, and Otsuka Canada have operated in concert, as part of a single operation known as the Otsuka Group, with regard to the development, research, distribution, manufacturing, and/or marketing of Abilify and Abilify Maintena in Canada. The Otsuka Group includes over 160 companies worldwide. Operations in North America account for nearly 40 percent of the Otsuka Group's consolidated sales.

97. H. Lundbeck A/S is a Danish corporation with its headquarters located in Copenhagen. H. Lundbeck A/S is a pharmaceutical company that specializes in the research and development, marketing, production and sale of drugs treating disorders of the central nervous system.

98. Lundbeck is a corporation incorporated under the *CBCA*, with its head office located in Montreal, Quebec. Lundbeck is a wholly owned subsidiary of H. Lundbeck A/S.

99. Lundbeck has operated in concert with Otsuka Canada and the other Defendants to market and promote Abilify Maintena in Canada. In November 2011, H. Lundbeck A/S entered into a development and commercialization agreement with Otsuka Pharma, which granted Lundbeck co-development and co-commercialisation rights for Abilify Maintena. Pursuant to this agreement, Lundbeck and Otsuka Pharma each obtain 50 percent of the net sales of Abilify Maintena in Canada, and sales efforts and costs are shared between the two companies in the same ratio.

100. The Defendants develop, manufacture, market, and distribute Abilify and Abilify Maintena in Canada and the United States.

MATERIAL FACTS

a) The Drug

i) Pharmacology

101. Abilify is indicated for the treatment of Schizophrenia, Bipolar I Disorder, and MDD. Abilify Maintena is indicated for the treatment of Schizophrenia and, since November 1, 2017, as maintenance therapy for Bipolar I Disorder. Both Abilify and Abilify Maintena are trade names for aripiprazole, an atypical antipsychotic agent.

102. Aripiprazole's exact mechanism of action is unknown. Aripiprazole attaches to several different receptors on the surface of neurons in the brain and disrupts the transmission of neurochemical signals between brain cells, thereby disrupting the ability of neurons to communicate with each other.

103. ~~Aripiprazole's design was based on the dopamine hypothesis. One of the neurochemical signals Abilify affects is dopamine.~~ Dopamine is a neurotransmitter that helps control the brain's reward and pleasure centres. ~~The dopamine hypothesis predicts that an excess of dopamine in the reward pathways of the brain causes delusions, hallucinations and disorganized thoughts.~~ The reward pathways are brain regions involved in cognitive control, motivation and emotional response. ~~Dopamine inactivity in the reward pathways and the prefrontal cortex, an area implicated in planning complex cognitive behaviour and moderating social behaviour, can cause or contribute to impairment in linguistic ability, an inability to experience pleasure, and autism.~~

104. The imbalance of dopamine activity in relation to Compulsive Behaviours has been thoroughly investigated in the scientific literature, with strong evidence supporting its contribution to long-term Impulse-Control Disorders.

ii) Development, Testing, and Approval of Abilify

105. Abilify was discovered by Otsuka Pharma in 1988 and developed by Otsuka Pharma until November 2002, when it was approved in the U.S. for the treatment of Schizophrenia. Abilify was subsequently approved in Japan in January 2006 as a treatment for Schizophrenia.

106. In June 2003, OPDC (known at the time as Otsuka Maryland Research Institute) submitted a Supplemental New Drug Application to the FDA for the approval of Abilify as a treatment for Bipolar I Disorder. This application was approved on September 29, 2004.

107. On November 16, 2007, Abilify was approved by the FDA as an adjunctive treatment for MDD, to be prescribed in conjunction with an antidepressant.

108. On February 22, 2008, BMS Canada submitted a New Drug Submission to Health Canada, seeking authorization to distribute, market and sell Abilify in Canada. On July 9, 2009, Health Canada granted a Notice of Compliance to BMS Canada, approving Abilify as a treatment for Schizophrenia and Bipolar I Disorder.

109. Abilify was approved in Canada largely on the basis of the information included in the NDA submitted for the purpose of obtaining U.S. FDA approval. No new studies were conducted in order to obtain the Canadian Notice of Compliance.

110. Abilify was first marketed in Canada in September 2009.

111. In June 2013, Health Canada approved the use of Abilify as an adjunctive therapy, alongside an antidepressant, in treating MDD.

112. In contrast, in Europe, Abilify is not indicated for the treatment of depression. The European Medicines Agency denied the indication of Abilify as an adjunctive treatment for MDD due to concerns regarding the effectiveness of the drug in treating depression.

113. In February 2014, Health Canada approved the sale of Abilify Maintena. Abilify Maintena was first marketed in Canada in May 2014, and is indicated only for the treatment of Schizophrenia.

iii) Marketing of Abilify and Abilify Maintena

114. At all material times, the Defendants aggressively marketed and promoted Abilify and Abilify Maintena to users and prescribers in Canada despite their knowledge of the risk of Compulsive Behaviours associated with the use of dopamine agonists and, in particular, Abilify and Abilify Maintena. The Defendants have heavily promoted Abilify as a desirable option for the treatment of Schizophrenia, Bipolar I Disorder, and MDD, stating that it is more effective and safer than other alternatives available in Canada for the treatment of these disorders.

115. To promote widespread use of Abilify, the Defendants engaged in intensive marketing in Canada and the United States. This marketing campaign sought to, and did in fact create the impression and belief in the Plaintiffs and other Class Members that Abilify was safe for use and had fewer side effects and adverse reactions than other medications used to treat Schizophrenia, Bipolar I Disorder, and MDD.

116. According to the November 2, 2015 Safety Review by Health Canada, the total annual number of prescriptions of Abilify in Canada is estimated to have increased from 3000 in 2010 to over 1 million in 2013.

117. In 2013 Abilify was the 5th best-selling drug in the world. BMS marketed and promoted Abilify as its “2013 largest-selling product” in the U.S., reporting worldwide revenue of USD\$2.02 billion from the sale of Abilify.

118. In 2014, global sales of Abilify totalled over USD\$6.4 billion.

119. In 2015, H. Lundbeck A/S saw global revenue of approximately CAD\$669 million from the sale of Abilify Maintena.

120. The product warnings in effect in Canada at all times during the Class Period, including the consumer information and the prescribing information provided to physicians and pharmacists, were wholly inadequate to alert the Class Members of the serious adverse effects associated with the use of Abilify and Abilify Maintena, including the risk of Compulsive Behaviours.

121. In particular, the Defendants failed to provide any or any adequate warnings about the severity, frequency and nature of these adverse side effects, and failed to ensure that adequate testing and studies were conducted to assess the potential link between the use of Abilify and Abilify Maintena and the onset or exacerbation of Compulsive Behaviours.

122. Even after the Canadian product monographs for Abilify and Abilify Maintena were revised on June 22, 2015 and September 15, 2015, respectively, the revised warnings remained incomplete and inadequate as they advised only of an increased risk of pathological gambling and hypersexuality in the case of Abilify, and an increased risk of an urge to gamble in the case of Abilify Maintena. Both product monographs continue to omit any reference to the risk of other compulsive behaviours, including binge-eating and compulsive shopping.

b) The Defendants' Knowledge of the Risks Associated with Abilify

123. The use of dopamine agonists has long been associated with Impulse-Control Disorders and Compulsive Behaviours. Prescribed usage of Abilify and Abilify Maintenance can result in harmful Impulse-Control and/or Compulsive Behaviours, including but not limited to:

- a) uncontrollable compulsive gambling, which can occur even in patients with no prior history of gambling;
- b) hypersexuality, even in patients who had little to no sex drive prior to using Abilify;
- c) compulsive shopping and/or spending; and
- d) compulsive binge-eating.

124. Discontinuation of Abilify often leads to near-immediate cessation of the compulsive behaviour.

125. Since as early as the year 2000, scientists have observed Compulsive Behaviours and Impulse-Control Behaviours associated with the use of dopamine agonists. In 2007, several studies were published linking the use of dopamine agonists, generally, and Abilify, specifically, to obsessive or Compulsive Behaviours.

126. For instance, Mirapex, known generically as pramipexole dihydrochloride, is also a dopamine agonist prescribed for the treatment of Parkinson's disease. A 2008 study presented at the International Congress of Parkinson's Disease and Movement Disorders conference in Chicago revealed that more than 13 percent of the 3,090 Parkinson's patients studied experienced compulsive behaviour, including compulsive gambling, shopping, hypersexuality or binge-eating.

The study found that patients who were taking Mirapex were two to three times more likely to develop one of these impulse-control disorders.

127. Since 2007, a rapidly growing body of scientific evidence has also demonstrated a causal link between the use of Abilify and Compulsive Behaviours.

128. A 2010 case study by Gavaudan and Magalon reported “a causal association” between the use of aripiprazole and pathological gambling in schizophrenic patients who had previously been treated with other antipsychotic drugs. The study revealed that the patients developed pathological gambling “a short time after starting aripiprazole” and that pathological gambling “rapidly resolved” shortly after discontinuation of aripiprazole.

129. In September 2011, Otsuka Pharma submitted its 6-Month Periodic Safety Update Report (the “Report”) to the European Medicines Agency. The Report acknowledged seven serious cases of pathological gambling, three of which were subjects of scientific studies published in medical literature, and another sixteen cases of pathological gambling reported in the BMS safety database. The Report concluded that “a causal role of aripiprazole could not be excluded”, and that “aripiprazole was suggested by the temporal relationship.”

130. The Report predated [REDACTED] first use of Abilify, and was released shortly after [REDACTED] first began to use Abilify ~~in December 2011~~. However, no warning was communicated to them ~~him~~ or to other members of the Classes regarding the risk of developing Compulsive Behaviours.

131. On October 19, 2012, the European Medicines Agency required that Otsuka warn patients and the medical community in Europe that the use of Abilify is associated with an increased risk

of pathological gambling. Specifically, the European Medicines Agency required that the Summary of Product Characteristics for Abilify contain the following warning under “Special Warnings and Precautions For Use”:

Pathological gambling

Post-marketing reports of pathological gambling have been reported among patients prescribed ABILIFY, regardless of whether these patients had a prior history of gambling. Patients with a prior history of pathological gambling may be at increased risk and should be monitored carefully.

132. The European Summary of Product Characteristics for Abilify contained additional information regarding other reported adverse reactions to the drug. The section entitled “Undesirable effects” listed the following possible side effects:

Psychiatric disorders: agitation, nervousness, pathological gambling, suicide attempt, suicidal ideation, and completed suicide

133. Despite these warnings and advisories in Europe for the same drug which was placed in the Canadian stream of commerce and which was marketed and sold to Canadians, the Canadian product monograph for Abilify made no mention of, let alone provide warnings about, the risk of developing Compulsive Behaviours. Further, the Canadian product monograph made no mention at all of the words “gambling”, “compulsive”, “obsessive”, or “impulse control”.

134. On June 22, 2015 and September 15, 2015, respectively, the Canadian product monographs for Abilify and Abilify Maintena were finally modified to advise of the following compulsive behaviours associated with the use of the drugs:

Pathological Gambling

Post-marketing reports of pathological gambling have been reported in patients treated with ABILIFY. In relation to pathological gambling, patients with a prior history of gambling disorder may be at increased risk and should be monitored carefully.

SIDE EFFECTS AND WHAT TO DO ABOUT THEM

...

The following other side effects may also happen in some people who take ABILIFY:

...

- hypersexuality (uncontrollable and/or inappropriate sexual behaviour of severity or duration that causes distress).
- an urge to gamble.

135. These warnings, however, were incomplete, inadequate, untimely and inconsistent with the state of science at all relevant times and failed to meet the applicable standard of care.

136. On November 2, 2015, Health Canada issued an advisory alert entitled “Safety information for antipsychotic drug Abilify and risk of certain impulse-control behaviours,” notifying the public of the recent Canadian product monograph revisions. The alert states:

Labels for the prescription antipsychotic drugs Abilify and Abilify Maintena (aripiprazole) have been updated to advise of an increased risk of impulsive behaviours of pathological gambling and hypersexuality.

Abilify, a tablet taken by mouth, is authorized to treat a certain type of bipolar disorder (bipolar 1, a serious manic-depressive illness involving extreme manic or mixed episodes) in adults and adolescents aged 13 years and older. It is also authorized to treat Schizophrenia and related severe psychotic disorders in patients aged 15 years and older, and Major Depressive Disorder in adults when used in combination with other drugs. Abilify Maintena is an injectable drug administered by health professionals and is used to treat Schizophrenia in adults.

The Canadian Product Monograph revisions are the result of a Health Canada safety review that found an increased risk of two types of impulsive behaviours with the use of these drugs: pathological (uncontrollable) gambling, and

hypersexuality (uncontrollable and/or inappropriate sexual thoughts, urges or behaviours that are so severe or last so long that they cause distress).

The review identified 18 international cases of pathological gambling and six international cases of hypersexuality in the published scientific literature. In most cases, the behaviours ceased or improved when treatment was stopped or when the dose was reduced, suggesting a direct link between the drug and the side effect. The reports involved male and female patients ranging from 19 to 64 years old. Health Canada also received five Canadian reports of pathological gambling and/or hypersexuality, but these contained limited information and therefore no conclusions could be made regarding what role, if any, the drugs may have played.

137. On February 23, 2017 and December 13, 2016 the warnings section of the Abilify and Abilify Maintena product monographs were updated again to provide more detailed information on Compulsive Behaviours associated with the drug:

Pathological Gambling and Other Impulse-Control Disorders

Post-marketing reports of pathological gambling have been reported in patients treated with aripiprazole. These reports suggest that patients can experience increased urges, particularly for gambling, and the inability to control these urges while taking aripiprazole. With regards to pathological gambling, patients with a prior history of gambling disorder may be at increased risk and should be monitored carefully. Other urges, reported very rarely, include: increased sexual urges, compulsive spending, binge or compulsive eating, and other impulsive and compulsive behaviors. Because patients may not recognize these behaviors as abnormal, it is important for prescribers to ask patients or their caregivers specifically about the development of new or increased gambling urges, sexual urges, compulsive spending, binge or compulsive eating, or other urges while being treated with aripiprazole. It should be noted that impulse-control symptoms can be associated with the underlying disorder; however, in some cases, although not all, urges were reported to have stopped when the dose was reduced or the medication was discontinued. Although impulse-control disorders have been reported very rarely, impulse-control disorders may result in harm to the patient and others if not recognized. Consider dose reduction or stopping the medication if a patient develops such urges while taking aripiprazole.

138. At all material times, the Defendants knew or ought to have known that Abilify and Abilify Maintena increases the risk of pathological gambling and other Compulsive Behaviours. They

nonetheless failed to warn, advise, educate, or otherwise inform Canadian Abilify and Abilify users or prescribers of such risks.

c) The Defendants Operated as a Single Group Enterprise in Relation to Abilify

139. At all material times, Otsuka and BMS, including BMS Canada, shared the common purpose of developing, manufacturing, distributing, marketing and selling Abilify for profit in Canada and worldwide. In this respect, they operated as a single group enterprise in that they:

- a) entered into the Agreement to co-develop and co-promote Abilify;
- b) actively participated in joint executive governance and operating committees with respect to Abilify;
- c) mutually provided funding and services including, *inter alia*, manufacturing, customer management, distribution and pharmacovigilance, for the benefit of their alliance;
- d) collaborated to complete the clinical studies of Abilify for Schizophrenia;
- e) copied each other with correspondence in relation to Abilify's regulatory approval, marketing and sale, and both met and conferred frequently to discuss and advance the promotion and sale of Abilify;
- f) were aware of the harm being done to Class Members by Abilify, and participated in, acquiesced in and approved the decision to continue promoting, marketing and selling Abilify despite their knowledge of the risk of Compulsive Behaviours associated with the use of drug;

- g) collectively decided not to warn the Plaintiffs ~~Matthew~~ and other Class Members of the increased risk of Compulsive Behaviours associated with the use of Abilify; and
- h) owed a duty to each other and to each Class Member and Family Class Member.

140. Further, in relation to Abilify Maintena, at all material times, Otsuka and Lundbeck shared the common purpose of developing, manufacturing, distributing, marketing and selling Abilify Maintena for profit in Canada and worldwide. In this respect, they operated as a single group enterprise in that they:

- a) entered into an agreement to develop and commercialize Abilify Maintena;
- b) equally shared in the net sales of Abilify Maintena in Canada;
- c) mutually provided funding and services for the benefit of their strategic alliance;
- d) shared sales efforts and costs in relation to Abilify Maintena;
- e) copied each other with correspondence in relation to Abilify Maintena's regulatory approval, marketing and sale, and both met and conferred frequently to discuss and advance the promotion and sale of Abilify Maintena;
- f) were aware of the harm being done to Class Members by Abilify Maintena, and they participated in, acquiesced in and approved the decision to continue promoting, marketing and selling Abilify Maintena despite their knowledge of the risk of Compulsive Behaviours, including compulsive gambling, associated with the use of the drug;

- g) collectively decided not to warn the Class Members of the increased risk of Compulsive Behaviours associated with the use of Abilify Maintena; and
- h) owed a duty to each other and to each Class Member and Family Class Member.

141. As described herein, the Defendants' operations were so intertwined that they operated as a single group enterprise or economic unit with respect to the development, manufacturing, marketing and sale of Abilify and Abilify Maintena, respectively.

CAUSES OF ACTION

a) Negligence

142. At all material times, the Defendants owed a duty of care to the Plaintiffs and Class Members to design, manufacture, market and distribute a safe product and to provide timely and adequate warnings of any health or safety risks associated with the use of these drugs.

143. At all material times, the Defendants knew or ought to have known that the use of dopamine agonists, generally, and Abilify and Abilify Maintena, specifically, carries an increased risk of developing Compulsive Behaviours.

144. Yet, despite their significant collective resources and the existence of a large body of scientific evidence highlighting the tendency of dopamine agonists generally, and aripiprazole specifically, to cause or materially increase the risk of developing Compulsive Behaviours, the Defendants failed to conduct any or any adequate pre- and/or post-market testing and research to confirm the safety of Abilify and Abilify Maintena. Instead, they continued to actively market these drugs as safe and effective treatments for Schizophrenia and, in the case of Abilify, for Bipolar I Disorder, and MDD in Canada.

145. Further, despite their knowledge that Abilify can cause or materially increase the risk of developing Compulsive Behaviours, the Defendants failed to provide any or any adequate warning to the Plaintiffs and other Class Members about the risk, breadth, and severity of the Impulse-Control and/or Compulsive Behaviours to which they could be exposed while using Abilify and Abilify Maintena.

146. The Abilify and Abilify Maintena product monographs in use at all relevant times did not provide the Plaintiffs and Class Members with any or any adequate warnings about the increased risk of developing Compulsive Behaviours. The information contained in the product monographs was ~~and remains~~ insufficient for many reasons, including but not limited to the following:

- a) The product monograph for Abilify failed to warn of the increased risk of Impulse-Control and/or Compulsive Behaviours, including compulsive gambling, hypersexuality, binge-eating, and compulsive shopping;
- b) The product monograph for Abilify Maintena failed to warn of the increased risk of Impulse-Control and/or Compulsive Behaviours other than hypersexuality, such as compulsive gambling, binge-eating, and compulsive shopping;
- c) The revised product monographs for Abilify and Abilify Maintena failed to reference the full range of Impulse-Control and/or Compulsive Behaviours associated with the use of Abilify; and
- d) The product monographs for Abilify and Abilify Maintena, including the revised product monographs, failed to disclose the severity of such adverse effects.

147. In manufacturing, marketing and distributing Abilify in Canada as described herein, the Defendants breached their duty of care to the Plaintiffs and other members of the Class. Specifically, the Defendants:

- a) failed to ensure that Abilify and Abilify Maintena were safe for use by Class Members, fit for their intended purpose and of merchantable quality;
- b) failed to adequately test Abilify and Abilify Maintena in a manner that would fully disclose the various side effects and the magnitude of the risks associated with their use;
- c) failed to conduct any or any adequate follow-up studies on the efficacy and safety of Abilify and Abilify Maintena;
- d) failed to provide the Plaintiffs other Class Members and prescribing physicians with any or any adequate warning, in the product monographs or elsewhere, of the serious risks of developing Compulsive Behaviours while using Abilify and Abilify Maintena;
- e) failed to investigate, research and warn the Plaintiffs, other Class Members, and physicians, pharmacists and others of the propensity of Abilify and Abilify Maintena to cause or materially increase the risk of developing Compulsive Behaviours, when they knew or ought to have known from existing scientific evidence relating to dopamine receptors and dopamine agonists that these drugs may cause or contribute to Compulsive Behaviours;

- f) failed to provide any or any adequate updated and current information to the Plaintiffs, other Class Members and their physicians respecting the risks and efficacy of Abilify as such information became available;
- g) failed to warn the Plaintiffs, other Class Members and their physicians about the need for regular monitoring to ensure that any Compulsive Behaviours were detected and addressed as early as possible;
- h) failed to establish any adequate procedures to educate sales representatives and prescribing physicians about the correct usage of Abilify and Abilify Maintena and their associated risks;
- i) falsely stated and/or implied that Abilify and Abilify Maintena were safe and fit for their intended purpose(s) when they knew or ought to have known that these representations were false;
- j) misstated the state of research, opinion and medical literature pertaining to the purported benefits of Abilify and Abilify Maintena and their associated risks;
- k) failed to cease the manufacture and distribution of Abilify and Abilify Maintena when they knew or ought to have known that these drugs have caused or could cause significant harm;
- l) disregarded reports of symptoms of Compulsive Behaviours among patients who used Abilify and Abilify Maintena;
- m) failed to monitor and to initiate a timely review, evaluation and investigation of reports of Compulsive Behaviours, associated with the use of Abilify and Abilify Maintena in Canada and around the world;

- n) after receiving actual or constructive notice of the side effects experienced from the use of Abilify and Abilify Maintena, failed to accurately and promptly disclose this information to Health Canada, cause adequate warnings to be issued, appropriately modify the product monographs, withdraw or recall the drugs, publicize the problems and otherwise act properly and in a timely manner to alert the Plaintiffs and other Class Members of all the known risks associated with the use of Abilify and Abilify Maintena, even after such warnings were issued in Europe;
- o) aggressively marketed Abilify and Abilify Maintena as safe and effective when they knew or ought to have known of the increased risk of developing Compulsive Behaviours; and
- p) encouraged their employees to increase sales volumes while neglecting to inform consumers, retailers, hospitals, physicians and pharmacists of the increased risk of developing Compulsive Behaviours associated with the use of Abilify and Abilify Maintena.

148. The Defendants' negligence involved both lawful and unlawful means with the predominant purpose of causing Class Members to acquire and use Abilify and Abilify Maintena when they knew or should have known that such use would cause harm to the Class Members and the Family Class Members.

149. The Defendants' negligence and failure to warn were particularly egregious as Abilify and Abilify Maintena are not addictive drugs and those who experience Compulsive Behaviours as a result of using these drugs are able to discontinue their use with little difficulty. Yet, motivated by

financial gain, including, *inter alia*, increased sales and profits, the Defendants acted in concert to conceal the risk of Compulsive Behaviours associated with the use of Abilify and Abilify Maintena.

b) Civil Conspiracy

150. At all relevant times, Otsuka and BMS, by their directors, officers, servants and agents, wrongfully, unlawfully, maliciously and lacking *bona fides*, conspired and agreed together, the one with the other, to, among other things, conceal the risk of Compulsive Behaviours associated with the use of Abilify, and to mislead the Plaintiffs and other Class Members about the health and safety risks associated with the use of the drug.

151. Further, at all relevant times, Otsuka and Lundbeck, by their directors, officers, servants and agents, wrongfully, unlawfully, maliciously and lacking *bona fides*, conspired and agreed together, the one with the other, to, among other things, conceal the risk of Compulsive Behaviours associated with the use of Abilify Maintena and to mislead the Plaintiffs and other Class Members about the health and safety risks associated with the use of the drug.

152. The Defendants' conduct as described herein was unlawful and constituted material and misleading information in breach of sections 36 and 52 of the *Competition Act*.

153. The Defendants' conduct as described was also unlawful in that the Defendants failed to provide adequate and timely warnings for side effects that they knew, or ought to have known, were associated with the intended use of Abilify and Abilify Maintena.

154. In conspiring to conceal the risk of Compulsive Behaviours from the Class Members, each of the Defendants was motivated predominantly by the following concerns and motivations:

- a) to increase or maintain sales volumes of Abilify and Abilify Maintena;
- b) to increase or maintain revenue;
- c) to increase or maintain profit;
- d) to increase or maintain market share;
- e) to avoid negative publicity and preserve public goodwill;
- f) to avoid the costs associated with conducting adequate, effective and targeted testing to study the link between the use of Abilify and Abilify Maintena and the risk of developing Compulsive Behaviours; and
- g) to place corporate revenue and profit above the safety of the Class Members.

155. In furtherance of the conspiracy, the Defendants and their employees, servants, and agents, engaged in, *inter alia*, the following acts:

- a) they set out not to conduct any adequate pre-market testing to confirm the existence of a causal relationship between the use of Abilify and Abilify Maintena and the onset of Compulsive Behaviours;
- b) they set out not to conduct any or any adequate post-market testing to confirm the existence of a causal relationship between the use of Abilify and Abilify Maintena and the onset of Compulsive Behaviours;

- c) they concealed the results of any pre- and post-marketing testing actually conducted from the public, regulatory authorities, prescribing physicians, and the Class Members;
- d) they disregarded or downplayed the existing body of scientific evidence on the risk of Compulsive Behaviours associated with the use of Abilify and Abilify Maintena;
- e) they knowingly or recklessly represented to the Plaintiffs and other Class Members that Abilify and Abilify Maintena were safe for use when they knew or ought to have known that the use of Abilify is associated with an increased risk of developing Compulsive Behaviours;
- f) they pursued an aggressive campaign in written form through, *inter alia*, product monographs, and via media communications, including television and internet advertising, to promote the use of Abilify and Abilify Maintena despite their knowledge that the use of these drugs increases the risk of developing Compulsive Behaviours; and
- g) they continued to place and distribute Abilify and Abilify Maintena in the stream of Canadian commerce without issuing any or any adequate warnings or revisions to the product monographs for these drugs.

156. The conspiracy was unlawful because the Defendants knowingly or recklessly, directly and indirectly, and in pursuit of their mutual business interests, made representations to the Plaintiffs, other Class Members and the public which were false or misleading in a material respect and which deceived them as to the health and safety risks associated with the use of Abilify and

Abilify Maintena. In making the misrepresentations as described herein, the Defendants breached sections 36 and 52 of the *Competition Act*.

157. The conspiracy was also unlawful because the Defendants knowingly or recklessly placed Abilify and Abilify Maintena into the stream of commerce with inadequate warnings about their potential to cause Compulsive Behaviours.

158. In the circumstances, the Defendants knew that the conspiracy would, and did, cause the Plaintiffs and other Class Members to suffer losses as described herein.

DISCOVERABILITY

159. The Plaintiffs did not, and could not have known, about the material facts giving rise to causes of action in negligent research and testing and civil conspiracy until November 2, 2015. The Plaintiffs plead and rely upon the doctrine of discoverability, s. 5(1) of the *Limitations Act 2002*, and equivalent provisions of other provincial and territorial legislation.

160. As early as the late 1990s, the manufacturer of Abilify had the duty and the opportunity to conduct appropriate and adequate pre-market research and testing with respect to the increased risk of Compulsive Behaviours associated with the use of partial dopamine agonists.

161. The Defendants failed to conduct such testing and research, conducted inadequate pre-market testing and research or, in the alternative, concealed the results of their pre-market testing and research from the public and healthcare providers, such that the Plaintiffs did not, and could not have known, about the causal relationship between Abilify /Abilify Maintena and Compulsive Behaviours until the issuance of the Safety Review on November 2, 2015.

162. Abilify was approved for marketing in the United States in 2002 and in Canada in July 2009. At all times prior to, and after, the approval of Abilify in Canada, the Defendants failed to conduct adequate post-marketing research and testing into the propensity of Abilify to cause, increase the risk of, or exacerbate Compulsive Behaviours. In the alternative, the Defendants concealed the results of their post-marketing research and testing from the Plaintiffs and the Class Members, such that these facts were not, and could not reasonably have been, known to the Plaintiffs and the Class Members before November 2, 2015.

163. As early as the early 2000s, the Defendants knew, or ought to have known, about the large number of spontaneous reports of compulsive gambling and other Compulsive Behaviours by clinicians and individuals taking Abilify and Abilify Maintena, but failed to conduct any or any adequate testing and research, or in the alternative, concealed the results of their testing and research, such that the facts giving rise to claims for negligence and conspiracy were not, and could not reasonably have been, known to the Plaintiffs and the Class Members prior to November 2, 2015.

FRAUDULENT CONCEALMENT

164. The Plaintiffs plead and rely upon the doctrine of fraudulent concealment with respect to the claims for negligent pre- and post-marketing testing and research and civil conspiracy.

165. The Defendants fraudulently concealed from the Plaintiffs and the Class Members that the use of Abilify and Abilify Maintena could cause, materially increase the risk of developing, or exacerbate pre-existing Compulsive Behaviours.

166. As manufacturers and distributors of Abilify and Abilify Maintena, the Defendants had a special relationship with the Class Members to provide adequate and timely warnings of the harmful side effects of these medications. Due to their depression, schizophrenia and/or Bipolar I Disorder, the Plaintiffs were particularly vulnerable and relied on the Defendants to provide timely and adequate warnings relating the harmful side effects of Abilify and Abilify Maintena.

167. The Defendants' conduct in conspiring to conceal the increased risk of Compulsive Behaviours associated with the use of Abilify and Abilify Maintena, as pleaded herein, was unconscionable as it exposed the Plaintiffs and the Class Members to further psychiatric, emotional, and financial harm.

168. By failing to provide adequate and timely warnings to the Class Members with respect to the causal association between Abilify/Abilify Maintena and Compulsive Behaviours, as pleaded herein, the Defendants concealed material facts pertinent to the Plaintiffs' and the Class Members' rights of action. The Plaintiffs could not have known of the Defendants' wrongful conduct and concealment as pleaded herein until the issuance of the November 2, 2015 Safety Review.

169. The doctrine of fraudulent concealment applies to limitation periods governed by the *Limitations Act, 2002*.

DAMAGES

170. As a result of the acts and omissions of the Defendants as alleged herein, the Plaintiffs and other Class Members have suffered, and will continue to suffer serious personal injuries, pain and suffering, including but not limited to: damage to or loss of reputation; emotional and psychological harm; expenses relating to medical treatment and other care and treatment for their

Compulsive Behaviours; extensive financial losses and out-of-pocket expenses, including loss of income as a result of their Compulsive Behaviours; and various other loss, injuries, and damages, the amounts and values of which will be particularized prior to trial.

171. As a further result of the acts and omissions of the Defendants, Gayle and other Family Class Members have suffered damages and loss, and will continue to suffer damages and loss, including but not limited to: actual expenses reasonably incurred for the benefit and/or due to the behaviour of the Class Members; a reasonable allowance for loss of income or the value of services provided to the Class Members; an amount to compensate for the loss of guidance, care and companionship they might reasonably have expected to receive from the Class Members; and emotional, mental and psychological damages as a result of the damages, injuries and losses sustained by the Class Members.

172. The Plaintiffs' injuries would not have occurred but for the acts and omissions of the Defendants, as described herein.

173. The undisclosed risks of Compulsive Behaviours associated with the use of Abilify and Abilify Maintena were in the exclusive knowledge and control of the Defendants and could not have been known to the Plaintiffs and other Class Members.

174. The Plaintiffs and other members of the Classes are also entitled to recover as damages or costs, in accordance with the *CPA*, the costs of administering the plan to distribute the recovery of damages recovered in this action.

AGGRAVATED AND PUNITIVE DAMAGES

175. The Plaintiffs claim punitive and aggravated damages for the reckless and unlawful conduct of the Defendants.

176. The Defendants' conduct as described herein was high-handed, reckless, and deliberate, represented a wanton disregard for the lives, health and safety of the Plaintiffs, other Class Members and the Family Class Members, and was motivated by economic incentives, thus warranting an award of punitive and aggravated damages.

177. The Defendants' conduct in concealing the risk of Compulsive Behaviours associated with the use of Abilify and Abilify Maintena and their failure to provide adequate, complete and timely warnings to the Plaintiffs and other Class Members exacerbated their injuries and damages, thus entitling them to aggravated damage. The Plaintiffs and other Class Members would not have used, or continued to use, Abilify and Abilify Maintena had they been properly and adequately warned about the increased risk of Compulsive Behaviours associated with the use of the drug.

178. Further, the Defendants' failure to provide adequate, complete and timely warning to and other Class Members was high-handed and motivated by malice, thus warranting an award of punitive damages. In particular, the Defendants continued to promote, market, and distribute Abilify and Abilify Maintena in the stream of Canadian commerce despite their knowledge of the serious risk of Compulsive Behaviours associated with the use of dopamine agonists generally, and Abilify and Abilify Maintena, specifically, which, as described herein, was recognized by the scientific community years prior to the latest revisions to the Canadian product monographs.

179. The Defendants have further engaged in the unlawful destruction of documents in the face of pending litigation. One of the Otsuka Defendants, OAPI, has destroyed safety related documents created in the years 2002-2006, inclusive. During this time period, Dr. Robert McQuade, Dr. Suresh Mallikaarjun and RA Forbes were engaged in research on aripiprazole. Large amounts of their safety related correspondence, in the form of emails, were destroyed by OAPI. These documents would contain important information regarding the early post-marketing experience with Abilify in the United States which would shed light on the state of knowledge possessed by the Defendants in relation to aripiprazole and Compulsive Behaviours.

180. This destruction of emails is contrary to regulatory requirements in place at the time in the United States, as well as reporting and document retention policies in Canada under *Food and Drug Regulations* C.010.020. Notably, the timing of the Defendants' unlawful destruction of documents coincides with litigation in the United States relating to the association between dopamine agonists and compulsive gambling, and the settlement of an American Department of Justice investigation into the Otsuka and BMS Defendants. It also coincides with revisions to the product monographs for dopamine agonists to include warning regarding the increased risk of pathological gambling and other Compulsive Behaviours.

181. The Defendants' reckless and wanton disregard for the health and safety of Canadian users of Abilify and Abilify Maintena is not an isolated incident. It forms part of a pattern of withholding critical information from, and providing inadequate warnings to, prescribing physicians and patients relating to the association between partial dopamine agonist antipsychotics and an increased risk of Impulse Control Disorders and Compulsive Behaviours.

182. For example, the Otsuka and Lundbeck Defendants have developed another antipsychotic drug with dopamine agonist properties, brexpiprazole sold under the tradename Rexulti, with a similar mechanism of action as Abilify and Abilify Maintena.

183. Rexulti received FDA approval on July 10, 2015 for the treatment of schizophrenia and as an adjunctive treatment for MDD.

184. Approximately two years later, on February 16, 2017 Health Canada issued a Notice of Compliance for Rexulti, which is currently indicated for the treatment of schizophrenia in Canada and also leads to Compulsive Behaviours in some individuals.

185. The initial 2015 American product monograph included no warning related to Compulsive Behaviours. However, in February 2018 the Warnings and Precautions section of the American product monograph was updated to provide a warning regarding Compulsive Behaviours, and specifically acknowledges a causal relationship between Rexulti and Compulsive Behaviours:

5.7 Pathological Gambling and Other Compulsive Behaviors

Post-marketing case reports suggest that patients can experience intense urges, particularly for gambling, and the inability to control these urges while taking REXULTI. Other compulsive urges, reported less frequently, include: sexual urges, shopping, eating or binge eating, and other impulsive or compulsive behaviors. Because patients may not recognize these behaviors as abnormal, it is important for prescribers to ask patients or their caregivers specifically about the development of new or intense gambling urges, compulsive sexual urges, compulsive shopping, binge or compulsive eating, or other urges while being treated with REXULTI. In some cases, although not all, urges were reported to have stopped when the dose was reduced or the medication was discontinued. Compulsive behaviors may result in harm to the patient and others if not recognized. Consider dose reduction or stopping the medication if a patient develops such urges.

186. The Defendants have not updated the Canadian product monograph warning section, despite having expanded the warning in the U.S. product monograph. The current Canadian

product monograph for Rexulti provides the following inadequate warning in the Health Professional Information section:

Impulsive behaviours

Post-marketing reports of impulse-control disorders including pathological gambling and hypersexuality have been reported in patients treated with another antipsychotic with partial agonist activity at dopamine receptors. Patients with a prior history of impulse-control disorder may be at increased risk and should be monitored carefully.

187. The Patient Information section merely includes, among a 29 item list, the following:

To help avoid side effects and ensure proper use, talk to your healthcare professional before you take REXULTI. Talk about any health conditions or problems you may have, including if you:

...

have problems with impulse control (i.e. gambling or sex addiction).

188. This insufficient warning is similar to the initial warning provided with Abilify Maintena when it was approved for use by Health Canada on February 6, 2014.

189. The Defendants are aware that Rexulti is essentially identical to Abilify. The development of Rexulti was motivated by commercial gain, not improvements in patient care. A 2017 article authored by two individuals, including Keming Gao, a member of the Otsuka advisory board notes that the development of Rexulti was predominantly a business decision related to the expiry of aripiprazole patent protection.

190. The Defendants' failure to provide adequate warnings, particularly to patients suffering from serious mental illnesses, is emblematic of a course of conduct which puts the Defendants' commercial interests over the health and safety of their Canadian consumers. The Defendants have

acted, and continue to act, with a deliberate, wilful, wanton, callous and reckless disregard for the well-being and safety of the Plaintiffs, entitling them to punitive, exemplary and aggravated damages.

191. The Plaintiffs plead and rely upon, *inter alia*, the following statutes and the regulations made thereunder, and their provincial and territorial equivalents (all as amended):

CPA;

Competition Act;

Consumer Protection Act 2002, S.O. 2002, c. 30, Schedule A;
FLA;

Negligence Act, R.S.O. 1990, c. N.1; and

Sale of Goods Act, R.S.O. 1990, c. S.1.

REAL AND SUBSTANTIAL CONNECTION

192. There is a real and substantial connection between the subject matter of this action and the Province of Ontario for the following reasons:

- a) several of the Defendants carry on business in Ontario;
- b) the Defendants manufacture, distribute and sell Abilify and Abilify Maintena in Ontario and derive substantial income in Ontario from such sales;

- c) Abilify and Abilify Maintena are approved for sale and are widely prescribed in Ontario; and
- d) the Plaintiffs' damages, and those of other Class Members resident in Ontario, were sustained in Ontario.

SERVICE EX JURIS

193. This statement of claim may be served without court order outside Ontario because the claim is:

- a) in respect of a tort committed in Ontario (rule 17.02(g));
- b) in respect of damages sustained in Ontario arising from a tort or breach of contract however committed (rule 17.02 (h));
- c) against a person outside Ontario who is a necessary and proper party to this proceeding properly brought against another person served in Ontario (rule 17.02(o)); and
