MNP

Digital Forensics and Investigative Services

Uncover the truth and make informed decisions in litigation and corporate investigations

Digital investigations can be highly stressful due to the complexity of navigating the ever-evolving digital landscape and the potential risks to sensitive data. Uncovering the truth and making informed decisions is crucial, but can be daunting without the right expertise and resources. MNP is here to help.

Digital investigations are performed to examine evidence in matters such as:

- Corporate espionage
- Intellectual property theft
- Fraud

- HR issues
- Insider trading
- Online defamation

- Forensic accounting investigations
- Cyber breaches

MNP's approach

MNP's investigations are conducted according to the principles of forensic science, which involve identifying and preserving digital data, examining and analyzing facts, and presenting findings in a concise and accurate manner. To stay ahead in the ever-evolving digital landscape, we continually enhance our methods to ensure we provide the most comprehensive and reliable results possible.

Providing support at any stage of the investigation lifecycle.

Prior to an Investigation

- Evidence collection and preservation
- Background and OSINT (Open Source) Investigations
- Incident response capability review
- Forensic strategy assessments

During an Investigation

- System and device forensic examination
- Litigation support
- Online and social media investigations
- Cyber incident support

Post Investigation

- Case reviews
- Expert witness testimony
- On-going litigation support and consulting
- User awareness training

Why choose MNP?

MNP's Digital Forensics team is part of our multidisciplinary Forensics and Litigation Support team, with more than 100 years of combined law enforcement and public practice experience. We are committed to helping organizations protect their data and investigate incidents. Equipped with the latest technology, we ensure our clients receive the most accurate and reliable results and have extensive experience working with law enforcement agencies and legal counsel to ensure the evidence we collect is admissible in court.
